

There's A New Star in Texas

Opening April 2005. A bright idea in pediatric care has arrived, where kids are always the stars and the medical care shines above the rest. Pediatric Surgery Center is the premier choice for North Texas families needing ambulatory surgical care for children.

The caring staff of medical professionals at Pediatric Surgery Center understands the special needs of children, so, we've created an outpatient surgery facility that makes everyone as comfortable as possible, using only pediatric anesthesiologists and a kid-friendly environment.

From top notch physicians and nurses to our facility designed especially for your child's needs. Hopefully, you'll never need us...but, isn't it good to know we're here.
